

Agencies working to get residents online

The Lake County Council on Aging and Tech Wise LLC have partnered with Connect Ohio to bring the "Every Citizen Online" training program to adults of Lake County.

Anyone age 18 or older is able to take free basic computer classes at local senior centers and the Council on Aging office on computer basics, Internet basics and email basics. The free computer training provided through the "Every Citizen Online" program will help adults use all the Internet has to offer.

Classes are free and registration may be done by calling 440-942-7853. Space is limited to the first 12 people for each class.

Classes begin Jan. 11.
